EXPERIENCE

Frontend Engineer

Headout

2020 - Ongoing Bengaluru, India
https://www.headout.com

Headout is an on-demand mobile marketplace that helps travellers discover & book the most incredible tours, activities, events & local experiences in town for the next 24 hours at exclusive discounted prices.

- Developed and built dashboard and related tools for Affiliates of Headout, Built various no-code, fully customizable Widget Generators for affiliates to embed dynamic and responsive widgets on their websites, Implemented neat SDK with Vanilla JS for advanced customisation of widgets for power users.
- Collaborated with Retention & Design team to build state-of-the-art Email Design System that sourced content and layout from Prismic (CMS) to generate cross device compatible emails on the fly by exposing API endpoints and integrated with internal marketing tool to send highly personalised emails.

Frontend Engineering Internship

Headout

2018 - 2020 Bengaluru, India

Joined Headout as an part time intern while studying for my masters simply to keep challenging self to learn more real world application of all the tools and frameworks that I came across, collaborated with several brilliant engineers who have made significant impact on my learning process and as an individual engineer.

- Built custom CMS solution with Prismic that could publish to any configured domain, and removed dev dependency from managing pages to just setting up domains and adding well documented features/new components in React & Storybook.
- Took care of day-to-day bug reports, identifying the root cause and patching appropriate fixes.
- Worked with retention and marketing team to build UI components for Core App, Blog and several other micro websites.

INDUSTRY EXPERTISE
